Safe Harbor

Certain statements in this communication may be 'forward looking statements' within the meaning of applicable laws and regulations. These forward-looking statements involve several risks, uncertainties and other factors that could cause actual results to differ materially from those suggested by the forward-looking statements. Important developments that could affect the Company's operations include changes in the industry structure, significant changes in political and economic environment in India and overseas, tax laws, import duties, litigation and labor relations.

Everest Kanto Cylinder Limited (EKC) will not be in any way responsible for any action taken based on such statements and undertakes no obligation to publicly update these forward-looking statements to reflect subsequent events or circumstances.

EKC is India's Largest Manufacturer of High-pressure Gas Cylinders Since 1978

Established Market Position

 **200+ SKU's**

Fungible production lines with diverse CNG and industrial applications

 **25+ Countries**

Cater to gas ecosystems across India, Europe, USA, South America, South-East Asia

 **150+ Clients**

Auto OEM's, City Gas Distribution, Industrials, Healthcare, Govt/Defence

Well-positioned to Capture Rising Demand

Expanding Gas Economy

India targets 15% share of natural gas in the energy mix by 2030

Growing CNG Ecosystem

CNG-fuelled vehicles on Indian roads expected to triple by 2030
**million vehicles*

EKC Capacity Expansion Plan

600,000 cylinders in India
240,000 cylinders in Europe
**million cylinders*

Management Commentary

Comments on Q3 FY22 performance by Pushkar Khurana, Chairman, Everest Kanto Cylinder Limited

The gas economy continues to expand rapidly across the world as governments and consumers increasingly look at driving higher volume of usage. With the price of crude oil rising considerably, and climate change becoming mainstream to the global agenda, we expect the current trend of gas adoption across a larger range of industries and applications to be maintained over several years to come. EKC, with its position as the leading manufacturer of high-pressure gas cylinders in India and a significant player in several international geographies, is poised to benefit from this trend. Our diversified and value-added product profile allows us to grow revenues, increase profitability and re-deploy cash flows for further capacity expansions. We see this as a secular trend that will enable business growth and drive long-term stakeholder value.

Comments on Q3 FY22 performance by Puneet Khurana, Managing Director, Everest Kanto Cylinder Limited

We have delivered strong operating and financial performance with positive contributions from all geographical locations. Revenues have increased by 88% with margin expansion after absorbing raw material and other cost escalations. Going forward, we are looking at re-pricing some historical contracts and further pass-through of costs. This should enable improved realizations, resulting in further margin firmness. We continue to see increased visibility of demand from diverse usage areas and are investing in both brownfield and greenfield expansions, financed largely by internal accruals. Our balance sheet has also supported the additional working capital requirement of a larger revenue base. We now expect the collective momentum of our various initiatives to drive continued scale and expand returns on capital.

Quarterly Overview – Q3 FY22 vs Q3 FY21

Revenues

Consolidated

↑ **Rs. 463.9 Cr**
87.8%

Standalone

↑ **Rs. 348.1 Cr**
73.8%

- * Strong growth across regions. India/UAE based on CNG adoption in the auto sector; US based on industrial activity
- * Ongoing volume expansion driven by implemented expansion and de-bottlenecking initiatives
- * This should enable improved realizations, resulting in further margin firmness

EBITDA

↑ **Rs. 97.3 Cr**
95.9%

↑ **Rs. 79.7 Cr**
66.1%

- * EBITDA margin expanded to 21.0% in Q3 after absorbing raw material and other cost escalations

PBT*

↑ **Rs. 87.4 Cr**
143.2%

↑ **Rs. 73.9 Cr**
86.7%

- * PBT margin expanded to 18.8% in Q3 from 14.5% on a year-on-year basis
- * Continuous cash generation, debt reduction and focused capex initiatives have resulted in lower interest cost, while depreciation remains at constant levels

PAT **

↑ **Rs. 60.1 Cr**
17.7%

↑ **Rs. 49.3 Cr**
60.7%

- * Profit After Tax margins continue to expand driven by volume growth and operating leverage
- * Basic Earnings Per share (EPS) at Rs. 5.36 in Q3 FY22 and Rs. 17.80 in 9M FY22

*Profit Before Tax is before exceptional items, provision for doubtful debts, foreign exchange and tax from continuing operations

**Profit After Tax includes exceptional gains

Centre to allow retrofitting of CNG kits in BS-VI petrol cars

The demand was felt for a while as only vehicles complying with the BS-VI emission norms are being sold across the country, officials said, adding that as of now vehicles which meet the emission norms of up to BS-IV are allowed for CNG retrofitment.

PetrolPLAZA

Last update: December 14, 2021

Egypt continues its push for CNG

Various government and private investments are boosting the conversion of vehicles to CNG and the installation of natural gas dispensers

CNG Demand has Multiple Drivers

BS-VI transition

Auto OEMs have significantly reduced diesel vehicle production due to rising costs/lower demand

Vehicle Scrappage Policy

Expected to drive new vehicle sales and CNG adoption

Conversion of diesel buses to CNG

STCs continue to convert diesel bus fleets to CNG

CNG price trends

CNG prices in India, linked to key international benchmarks, at significant discount to other liquid fuels

Cost of vehicle ownership

CNG vehicles operate on much lower cost per kilometer

Environmental concerns

India is a participant in the global commitment to setting net zero emission targets

Revival in Economic Growth to Drive Industrial Demand

Industrial Demand is driven by capex activity, expected to accelerate resume growth after the recent weakness

Gross Fixed Capital Formation

GVA from Industrial Sector (Current Prices)

Source: RBI Handbook of Statistics: (Rs. Trillion)

Industrial Demand Drivers

Fire Equipment and Fire Suppression Systems

- * The global fire safety equipment market is estimated at \$ 58 billion in 2018 – and expected to expand at CAGR of 8.8% from 2019 to 2025
- * Demand for advanced fire safety systems is expected to be driven by industries such as manufacturing, utilities, petrochemicals, mining, oil & gas exploration, energy & power, automotive and construction
- * Countries across the world are adopting stringent regulations mandating installation of fire safety systems at industrial, residential and commercial locations

Supply to Medical Establishments

- * Medical gas supply systems in hospitals and other healthcare facilities create an ecosystem of specialized gases and gas mixtures – including oxygen, medical air, nitrous oxide, nitrogen, carbon dioxide, medical vacuum and anesthetic gases
- * Gases are used across general wards, operating theatres, intensive care units, recovery rooms and other major treatment rooms
- * With the expansion of medical facilities in urban as well as rural areas, both public sector and private sector demand for medical gases, cylinders and other allied equipment is increasing steadily

Industrial Demand Drivers

Aerospace and Defense

- * The Global Aerospace and Defence Industry has been growing on the back of rising commercial aircraft production and strong defence spending
- * Aerospace demand is focused on next-generation, fuel-efficient aircraft with order backlog continuing to rise – the industry uses gases extensively for a wide range of applications that cover welding, cutting, heating, laser gas, thermal spray coating, heat treatment processes
- * In the defence sector, continued global tensions and geopolitical risks have driven higher spending – growing demand based on replacement of fossil fuels with alternative fuels for operating aircraft, combat ships and vehicles, and supporting equipment

Specialty Gases

- * Growing number of gas applications in non-traditional areas such as space research, food preservation/distribution, agricultural processing etc
- * Key usage verticals include automobiles, F&B, oil and gas, construction, ports/shipping, space and thermal power etc

Extensive Range of Products

CNG Steel Cylinders

- * Wide range of CNG cylinders designed and manufactured to comply with the highest quality and safety standards
- * Products built to customer specifications for cars, buses, three-wheelers and delivery vehicles
- * Strong, lightweight cylinders undergo stringent testing to assess fatigue strength, usage life, safety and reliability under extreme weather conditions

Industrial Cylinders

- * Wide range of industrial cylinders designed for industrial gases, medical and food & beverage applications
- * Preferred worldwide for quality, aesthetics and versatility of products
- * Adhering with the most stringent regulations in India and internationally (ISO 9809, IS 7285)

Medical Oxygen

- * Safe, contamination-free cylinders storing gases such as oxygen and nitrous oxide
- * Products comply with stringent standards applicable in India and internationally or specific customer requirements

Cylinders For Hydrogen Gases

- * Cylinders, quads and cascades for storage/transportation of Hydrogen at high pressure
- * Manufactured from steel suitable for Hydrogen storage, a gas with flammable and embrittling properties

Products with a Wide Range of Applications

Fire Extinguisher Body

- * Cylinders for storage of carbon dioxide – used in fire extinguishers, rubber rafts and aerated water
- * Range covers capacities of 1 litre to 180 litre , hand-held and portable wheel-type extinguishers
- * Powder coated for better visual appeal and longevity

Breathing Air Cylinders

- * Compressed breathing air cylinders adhering with IS 7285 – rated at working pressure of 200-300 bars
- * Complete product range from 1L to 9L cylinders

Jumbo Cylinders

- * Large Capacity Jumbo Large capacity cylinders conforming to Indian/international standards or based on specific customer requirements
- * Jumbo Cylinders/Skids are used for industrial gases such as Nitrogen, Helium, Argon etc. with several defence/aerospace applications

Type 4 Composite Cylinders

- * Type 4 composite cylinders manufactured in EKC's USA plant adhere to stringent international regulations (ISO 11119-3, ISO 11439, NGV2)
- * Light-weight cylinders made from special aluminium alloys, used for specialty/medical/industrial gases, including fire extinguishers and breathing apparatus

Planned Capacity Expansions

| Location | Capacity Addition | Capex | Funding Sources | Revenue Potential | Completion Timeline | Additional Details |
|---|---|------------------------------|--|----------------------------|---|--|
| Tarapur, Maharashtra / Kandla, Gujarat | Brownfield expansion – 400,000 cylinders annually De-bottlenecking and expansion of existing lines | Rs. 35 crore | Internal Accruals | Rs. 300 Cr* | Phase I: Completed Phase II: Q2 FY23 | <ul style="list-style-type: none"> * De-bottlenecking and expansion initiatives have already improved output in existing production lines * Further revenue expansion potential of ~Rs. 100 crore annually from Phase II expansion |
| Mundra, Gujarat | Greenfield expansion – initial increase in production by 200,000 cylinders annually | Rs. 45 crore (initial phase) | Internal Accruals | Rs. 200 Cr (initial phase) | Initial phase by Q2 FY24 | <ul style="list-style-type: none"> * Acquired contiguous land parcels aggregating 54 acres that will allow modular expansion in multiple phases * Available equipment will enable reduced capital intensity of the expansion * Located 30 kms from existing manufacturing facility at Kandla SEZ to result in operating/cost efficiencies |
| Hungary | Greenfield expansion via 80:20 JV – 240,000 cylinders annually | €16 million | Equity: 20%** Debt: 50% Govt Cash Subsidy: 30% | €25 million | FY24 | <ul style="list-style-type: none"> * Setting up local, EU-focused manufacturing * Advantages of better market acceptability and exemption from EU import duties * Low-cost land, tax exemptions, other fiscal benefits from the Hungarian government |

*Based on Phase I of brownfield expansion/de-bottlenecking initiatives, initial revenue growth has already been achieved. The balance revenue expansion can be achieved following implementation of Phase II.

**EKC contribution 80%

International Operations Target Widespread Global Gas Usage Expansion

USA

- * Leader in innovation, producing large, seamless pressure vessels
- * Product portfolio includes ground storage and mobile transportation for industrial gases and alternative fuels, on-board cylinders for passenger and commercial vehicles, flasks for the U.S. Government Shipboard Systems, specialty vessels for foreign military, vessels for oil and gas exploration and cylinders for other specialty applications
- * Also marketing DOT-approved industrial cylinders sourced from India and Dubai

Europe

- * Signed JV with Rev Gas Industries Ltd, Hungary to set up a state-of-the-art manufacturing plant in Hungary for seamless high pressure CNG/industrial gas cylinders and cascades for bulk storage for the European Markets
- * Key markets: Italy, Germany, France, Hungary

UAE

- * Deals in CNG cylinders, industrial cylinders, cascades, multiple element gas containers, specialized fire suppression systems and fire detection/alarm systems
- * Targets markets include the Middle East, South America, Eastern and Western Europe
- * Received approvals enabling supply of cylinders worldwide, including exports to India
- * Increasing demand from MNC's expanding presence in the Indian fire-fighting market
- * Supplementary production base for Indian operations, enabling reduced inventory cost at group level

About Us

Everest Kanto Cylinder Limited (EKC) (BSE: 532684, NSE: EKC), established in 1978, is a clean energy solutions company and a leading global manufacturer of seamless steel gas cylinders with over 20 million industrial gas and CNG cylinders currently in service.

EKC operates two manufacturing facilities in India located at Tarapur (Maharashtra) and Kandla SEZ (Gujarat) and two international facilities at Jebel Ali Free Zone in Dubai and Pittsburgh (PA), USA, with aggregate capacity of about 1 million cylinders annually. EKC's product range of industrial, CNG and jumbo cylinders is used for high pressure storage of gases such as oxygen, hydrogen, nitrogen, argon, helium, air etc and finds applications in a wide variety of industries such as manufacturing, fire equipment/suppression systems, medical establishments, aerospace/ defense and automobiles apart from some specialized usage areas.

Given its strong position in the Indian domestic market and wide acceptance across several key international markets built over the last four decades, EKC is poised to benefit from the increasing usage of gases in industrial production and automobile sectors based on both economic and environmental considerations.
