Clean Energy Solution Company

Commenting on the performance for the quarter, Mr. Pushkar Khurana, Chairman and Executive Director, and Mr. Puneet Khurana, Managing Director, said in a joint statement:

"We reported a steady performance in Q2. In our CNG segment, demand in India was temporarily affected by the GST transition within our end-user automotive industry, resulting in a short-term impact on domestic volumes. Activity has since normalised as the industry moved into October, and underlying demand indicators remain supportive. Our Industrials business continued to perform in line with expectations.

In our US operations, quarterly trends reflected the order-driven nature of the business. While dispatches during the quarter were lower, the segment remains healthy on an H1 basis, and the outlook for the region in the second half remains strong, supported by a robust order book. Our operations in the Middle East also showed early signs of improvement during the quarter.

On the expansion front, we are progressing well with our new facilities at Mundra and Egypt. The Egypt plant is preparing to begin trial production shortly, and construction at Mundra continues to advance as planned. Both facilities remain on track and will significantly enhance our manufacturing capabilities in the coming year, enabling us to better serve domestic and international markets.

With growing opportunities across clean energy and industrial applications, coupled with greater visibility in our order pipeline, we remain confident about our future growth prospects. Our efforts remain centred on advancing our capabilities, improving operating efficiency, supporting customers across domestic and international markets, and strengthening our leadership position in India."

<End>

About Everest Kanto Cylinder Limited

Everest Kanto Cylinder Limited (EKC) (BSE: 532684, NSE: EKC), established in 1978, is a clean energy solutions company and a leading global manufacturer of seamless steel gas cylinders with over 20 million industrial gas and CNG cylinders currently in service.

EKC operates two manufacturing facilities in India located at Tarapur (Maharashtra) and Kandla SEZ (Gujarat) and two international facilities at Jebel Ali Free Zone in Dubai and Pittsburgh (PA), USA, with aggregate capacity of about 1.5 million cylinders annually. EKC's product range of industrial, CNG and jumbo cylinders is used for high pressure storage of gases such as oxygen, hydrogen, nitrogen, argon, helium, air etc and finds applications in a wide variety of industries such as manufacturing, fire equipment/suppression systems, medical establishments, aerospace/ defence and automobiles apart from some specialized usage areas.

Given its strong position in the Indian domestic market and wide acceptance across several key international markets built over the last four decades, EKC is poised to benefit from the increasing usage of gases in industrial production and automobile sectors based on both economic and environmental considerations.
